- 1. Introduction
- 2. How to install the app
- 3. How to register and make a reservation for those who are visiting our ho spital for the first time
- 4. Registration for those who have a medical examination ticket for this ho spital
- 5. <u>Manage multiple accounts with one smartphone-Family registration function and usage registration-</u>
- 6. Reservation / confirmation / change / cancellation
- 7. How to use at the time of visit (other than those who visit our hospital for the first time)

Introduction

The "Mother and Child JRCS App" is required when visiting the "Tokyo Katsushika Red Cross Maternal and Child Medical Center".

We do not have a medical examination ticket.

The "QR medical examination ticket" in the app will replace the medical examination ticket.

In addition, since the app will guide and call the medical examination on the day, you will not be able to receive medical examinations without the Mother and Child JRCS app.

If you cannot install the app or do not have a **smartphone**, we will hand you a **rental smartphone** at the general reception when you come to the hospital.

If you are attending a pediatric outpatient visit with someone other than your parents, please let us know in advance about the above. Please install the app in advance and log in with your child's medical examination ticket number or use a rental smartphone.

Below, we will explain how to use it.

Please read it before your first visit.

If you have any questions, please contact the general reception.

We cannot answer inquiries about problems when installing the app.Please check the handling instructions for your smartphone.

How to install the app

- 1. Tap the link below on your smartphone to install the app
 - Click here for Android (PlayStore)
 - Click here for iPhone (App Store)
- 2. Select "Allow" in the notification permission selection
 - If you do not allow the notification, the information about the examination room will not reach your smartphone, so be sure to set it to "Allow". It is also convenient to make sounds and vibrations so that you can understand without looking at the screen.

How to use at the time of visit (other than those who visit our hospital for the first time)

How to move at the time of visit

step1: Open the QR consultation ticket

- 1 Launch the app.
- 2 Display the home screen.
- (3) Press the "QR medical examination ticket".

step2: Hold the QR code over the reception terminal

There is a terminal on the left side of the front entrance of the hospital, so hold the QR code over the reading part.

step3: See the PUSH notification and move to the relevant location

The PUSH notification will notify you of the next destination, so move to that location.

* When will the notification arrive on your smartphone?

The notification comes only at the first reception when you hold the QR examination ticket over the terminal.

After the reception is completed, the notification will be sent when you call from the examination room or examination room.

Please see the LCD screen of the terminal for guidance when holding the QR examination ticket over the terminal.

step4: Hold the QR code over the terminal at the arrival location

Hold the QR code over the terminal where you arrived. Check the text "Reception completed" and wait at a nearby waiting room.

step5: Follow the PUSH notification of the call and enter the examination room / examination room

step6: Move to the next location

The staff in charge will guide you to the next location.

When you arrive at the next location, follow the steps from step 4 onwards.

step7: If you don't know where to go next, such as error display ...

- 1 Launch the app.
- 2 Display the home screen.
- 3 Press "Reservation details".
- 4 View today's schedule The next clinic is displayed with @ " **NOW** ".
- X If you don't know how to operate it, please contact the staff near you.
